

# ITScriptNet® - OMNI™ Full Quick Start Guide

Thank you for choosing ITScriptNet® for your data collection solution! Using the ITScriptNet System Console follow these steps to get the software loaded and registered, and the communications established between the host server and your devices. This guide assumes that you have successfully configured the homebase (if used) and the device(s) for proper communication with the appropriate PC. If you are experiencing difficulty with establishing communication, please refer to your device's User Guide (in the Documentation tab of the System Console) or to our Frequently Asked Questions area under the Support link at [www.z-space.com](http://www.z-space.com). This guide also assumes that the proper infrastructure of network communications is in place. This would include access points that are properly configured.

## Step 1. Install ITScriptNet

ITScriptNet uses a setup program to step you through the installation process. The program can be installed from the CD (if provided) or by downloading from our web site. To install the program from the CD, put the CD-ROM in your drive. The setup program will run automatically. If it does not, select **Start >Run**, and enter **x:ITSN\_AutoRun.exe** where **x:** is the letter of your CD-ROM drive. Enter your ITScriptNet serial number or select the software version from the dropdown list. If you are downloading from the web site, go to <http://www.z-space.com/ITScriptNet/download.htm>. Select 'ITScriptNet Full Demo Download Page'. Fill out the form. Select 'ITScriptNet OMNI (Full) (30Meg)'. Select 'Save' and save the file to your Desktop or to a folder of your choosing. If saved to your Desktop double click the icon and follow the on-screen instructions. If saved to a folder, locate the ITScriptNetOMNI\_All\_(Ver).exe and double click it. Follow the on-screen instructions.

## Step 2. Register ITScriptNet OMNI Designer

Upon completion of the installation process, the setup program will open the ITScriptNet System Console. Select the *Licensing* tab. Select *Add Designer License* from the right view window. Please read the License Agreement. If you accept these terms click the *Accept* button. If your computer has Internet access select *Automated Registration* and follow the four steps below. If your computer does not have Internet access click the *Manual Registration* button and go to Manual Registration below.

Step 1: Enter your OMNI Program Designer serial number. When a valid serial number is entered, the *Next* button will activate. Click the *Next* button.

Step 2: This step verifies the status of the product registration on the PC. When upgrading from Batch or Batch Plus, a field will display requesting the original product's serial number. If you are registering the OMNI Program Designer on a different PC than where the original Batch or Batch Plus Program Designer serial number resides, you must first unregister the Batch or Batch Plus Program Designer from the other PC. Please refer to the User Guide for instructions on how to unregister. If you are not upgrading, a message will display instructing you to click *Next*.

Step 3: Enter your email address, name and company name. Click *Next*.

Step 4: Enter your company's full address and the name of the company from which you purchased the software. Click *Next*. A message that you have successfully registered will appear. Click *Finish*. Proceed to **Step 3. Register the OMNI Runtime License.**

### Manual Registration (for PCs with no Internet access)

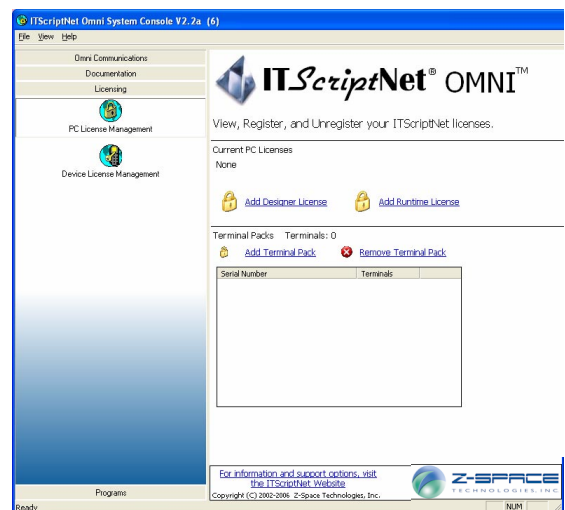

In Step 1, enter your OMNI Designer serial number. A Registration Number will be displayed. Call Z-Space Technologies, (440) 899-7370. Z-Space will provide you with a Registration Code to enter in Step 3. After entering the Registration Code click *OK*. Click *OK* on the Registration Complete screen.

## Step 3. Register the OMNI Runtime License

From the *Licensing* tab select *Add Runtime License* from the right view window. Please read the License Agreement. If you accept these terms click the *Accept* button. If your computer has Internet access select *Automated Registration* and follow the four steps as described in **Step 2** above, substituting Runtime for Designer. If your computer does not have Internet access click the *Manual Registration* button and follow the Manual Registration process from **Step 2** above.

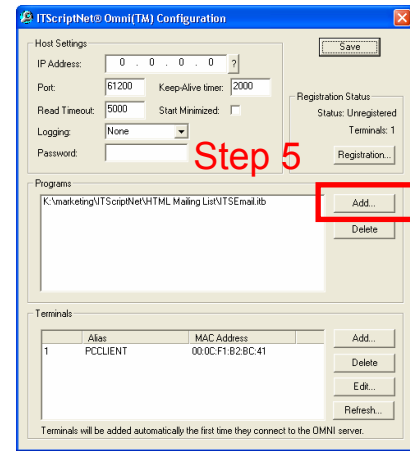

## Step 4. Register the OMNI x-Pack Client License

From the *Licensing* tab select *Add Terminal Pack* from the right view window. Please read the License Agreement. If you accept these terms click the *Accept* button. If your computer has Internet access select *Automated Registration* and follow the four steps as described in **Step 2** above, substituting Terminal Pack for Designer. If your computer does not have Internet access click the *Manual Registration* button and follow the Manual Registration process from **Step 2** above.

### Step 5. Add Programs to OMNI Server

Select the *OMNI Communications* tab. Select *OMNI Server Configuration* in the left window then again in the right window. To specify which programs can run on the OMNI Server click the Add... button in the Programs section of the screen. Browse for and select the programs you want to add to be available for wireless communication.

### Step 6. Load OMNI Client software onto the device

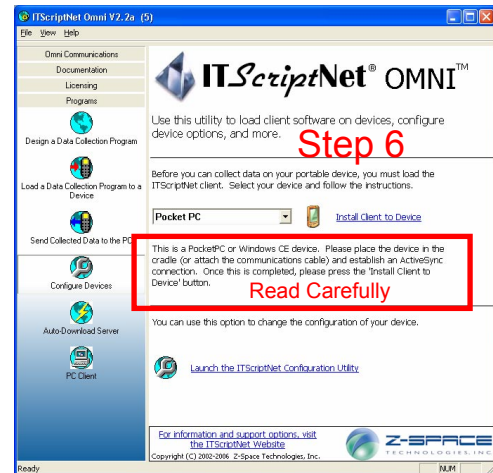

Select the *Programs* tab. Select *Configure Devices*. From the dropdown list select your device. Read the instructions below the device selection to make sure your device is properly connected. Select *Install Client to Device*. Follow the on-screen instructions.

### Step 7. Configure the Device for OMNI communications

On the device run ITScriptNet OMNI. From the main menu select *Utilities*. Refer to your terminal's Client Guide (select *Documentation* tab) for instructions on setting the options. Be sure to select the OMNI Server as the port and enter the host PC's IP address. Click *Save* or *OK* to save your changes.

### Step 8. Start the OMNI Server

Select the *OMNI Communications* tab. Select *OMNI Server* in the left window then again in the right window. You will see the OMNI Server main screen, listing the programs you configured in **Step 5**. 'X' out to close this window and run the OMNI Server in the task tray or select 'Shutdown' to stop it.

### Step 9. Load Programs onto the device

Select *Load Programs* from the ITScriptNet Device Client menu. If your OMNI Server is configured properly, you will be presented with the list of programs you added to your OMNI Server in **Step 5**. Select one of these programs and press OK to load the program onto the terminal.

**Step 10. Collect Data** – Select *Collect Data* from the ITScriptNet Device Client menu to begin collecting data.
